Re: FESHM Chapter 4195 – Special Toxic Hazards - Silica

The chapter mentioned above was updated as detailed below and sent out for labwide review:

- Revised to meet the requirements of 29 CFR 1926.1153.
- Revised the definition of Competent Person.
- Added references to requirements for industrial hygiene sampling.
- Clarified that the "silica" activities at Fermilab are such that it is not expected that a medical surveillance program will be needed, but the Medical Office shall develop one at such time it becomes required.
- Added a section on housekeeping.
- Added a section on access restriction.
- Added a section on disposal.
  Added references to Silica Written Exposure Control Plans, Predictive Solutions, and Section 013100

Comments received during the review period were evaluated by SMEs and corrections were made to the chapter as appropriate so the updated chapter is ready for approval and release.

The chapter has been sent to you and Lisa Vega electronically. If a paper copy is required, you may either print one out or contact Lisa and she will provide one to you.

Please return this signature page to T.J. Sarlina at MS 119 after Directorate approval.
