

JAN 21 2014

Ms. Martha Michels, Director  
Environment, Safety, Health, & Quality  
Fermilab  
P.O. Box 500  
Batavia, IL 60510

Dear Ms. Michels:

SUBJECT: 2013 HAZARDOUS WASTE REPORT

References: Letter, from H. Wright to Hazardous Waste Generators, undated, Subject: Same  
As Above

The Illinois Environmental Protection Agency (IEPA) requires that Fermilab complete the 2013 Hazardous Waste Report, pursuant to the requirements under 35 *Illinois Administrative Code*, Part 725. IEPA provides a website, where you may obtain the .pdf files of the reporting forms/instructions and a downloadable software package for data entry:  
[www.epa.state.il.us/land/hazardous-waste/forms/index.html](http://www.epa.state.il.us/land/hazardous-waste/forms/index.html).

If you are unable to access the reporting forms via the Internet, you may request a printed copy of the reporting forms from IEPA by telephoning Hope Wright at (217) 785-2361. Ms. Wright may also be contacted regarding technical questions and completion of the report.

IEPA also requires that large-quantity hazardous waste generators pay a 2013 Large Quantity Generator Annual Fee of \$500. You do not need to pay this fee, since Fermilab is already paying \$500 in permit/inspection fees for its hazardous waste storage facility.

We will appreciate receiving confirmation of the completed electronic report in this office no later than February 14, 2014. If possible, please provide a hard copy at that time. If you have other questions, please contact Rick Hersemann, of my staff, at extension 4122.

Sincerely,

Michael J. Weis  
Site Manager
