

ESH&Q Frequently Asked Questions: Fire Systems

FAQ	Response	Contacts
What do I do if I find a damaged and/or leaking Fire Protection System Valve in my work area(s)?	Fire Department valves are inspected regularly by Fire Department Personnel. In the event any are found damaged or leaking, report the equipment and location to the Fire Department Shift Commander on duty at ext. 3428. He in turn will contact the responsible person/department to facilitate repairs.	Charles Kuhn Brian Schopp
