

Memorandum

October 26, 2015

To: Timothy I. Meyer, COO 
From: Martha Michels 
Subject: FESHM Chapter 10180 – Aerial Lifts (Initial Release)

Man-lifts, articulating boom lifts, scissor lifts, and other lifts are used throughout Fermilab to perform a variety of functions. Equipment of this type is often grouped together under the title “aerial lifts.” The use of aerial lifts creates a potential for serious injury and property loss. This chapter contains procedures to ensure that the operation, inspection, and maintenance of aerial lifts are conducted in a safe manner and that operators are qualified to operate the lift safely.
