Re: FESHM Chapter 6020.5 – Flammable & combustible Liquids (New) and
FESHM 5032.1 – LN and Lar Dewar Installation and Operation Rules

A new FESHM chapter, 6020.5, has been written to provide guidance for the prevention of, and protection against, fires and explosions in occupancies handling, processing, or transferring ignitable liquids.

The scope of FESHM 5032.1 has been expanded to include liquid argon dewars in addition to liquid nitrogen dewars.

Both chapters have gone out for labwide review, all comments received have been addressed by Subject Matter Experts, and they are now ready for Directorate approval & release.

The chapter has been sent to you and Lisa Vega electronically. If a paper copy is required, you may either print one out or contact Lisa and she will provide one to you.

Please return this signature page to T.J. Sarlina at MS 119 after Directorate approval.

Recommended for Approval:

Timothy I. Meyer, COO
