Re: FESHM Chapter 5100 – Structural Safety

The new chapter mentioned above was created and sent out for labwide review:

- There are a wide variety of structures at Fermilab and Fermilab leased spaces, and therefore a variety of potential hazards to people and property if these structures are improperly designed, constructed, modified, or re-used. The IBC defines a structure as “that which is built or constructed”.

Comments received during the review period have been addressed by the Subject Matter Expert and the chapter is ready for approval and release.

The chapter has been sent to you and Lisa Vega electronically. If a paper copy is required, you may either print one out or contact Lisa and she will provide one to you.

Please return this signature page to T.J. Sarlina at MS 119 after Directorate approval.

Recommended for Approval:
