**Re:** FESHM Chapter 4310 – Nanomaterials

---

A new chapter has been written dealing with the safe handling and disposal of nanomaterials. The chapter has gone out for labwide review, all comments received have been addressed by Subject Matter Experts, and it is now ready for Directorate approval & release. While the current level of hazard at the laboratory is low, it has the potential to grow in the future so this is a timely document.

The chapter has been sent to you and Lisa Vega electronically. If a paper copy is required, you may either print one out or contact Lisa and she will provide one to you.

Please return this signature page to T.J. Sarlina at MS 119 after Directorate approval.
