Re: FESHM Chapter 7005 – Facility Construction, Modification & Inspection (New)

A new FESHM chapter, 7005, has been written to outline the requirements for construction, modifications, renovations, alterations, new equipment or facilities for operational use and occupancy. Review of design specifications and codes in conjunction with field inspections for conventional facilities are required for all Fermilab projects. Three new forms have also been created to support the requirements of the chapter.

The chapter applies to Fermilab site, Leased Spaces, and Non-Leased Spaces for inspections and authorization for use and possession, as delineated in the Fermi Research Alliance subcontract Terms and Conditions.

The chapter has undergone extensive labwide review and all comments received have been addressed by Subject Matter Experts. The chapter is now ready for Directorate approval & release.

The chapter has been sent to you and Lisa Vega electronically. If a paper copy is required, you may either print one out or contact Lisa and she will provide one to you.

Please return this signature page to T.J. Sarlina at MS 119 after Directorate approval.

Recommended for Approval:

Timothy I. Meyer, COO
