Re: FESHM Chapter 7090 – Tech Shop Safety (New)

A new FESHM chapter, 7090, has been written to provide training guidelines for all personnel using machine equipment in designated tech shops, as opposed to Machine Shops, at Fermilab. Equipment covered under this chapter includes but is not limited to; lathes, milling machines, drill presses, band saws, grinders, powered sanders, chop saws, and other mechanically operated tools such as breaks, punches and shears. Two On The Job (OJT) evaluation forms have also been created to support the training modules that were developed.

The chapter has undergone extensive labwide review and all comments received have been addressed by Subject Matter Experts. The chapter is now ready for Directorate approval & release.

The chapter has been sent to you and Lisa Vega electronically. If a paper copy is required, you may either print one out or contact Lisa and she will provide one to you.

Please return this signature page to T.J. Sarlina at MS 119 after Directorate approval.

Recommended for Approval:

Timothy I. Meyer, COO
