Re: FESHM Chapter 10190 – Crane Personnel Lifting Platforms, Man-Baskets (New)

A new FESHM chapter, 10190, has been written to specify the design, inspection, use and maintenance requirements of personnel lift platforms suspended from cranes at Fermilab. The use of a crane to hoist employees on a personnel platform is prohibited, except when the erection, use and dismantling of conventional means of reaching the work area (e.g. personnel hoist, ladder, stairway, aerial lift, elevating work platform, or scaffold) would be more hazardous, or is not possible because of industrial design or worksite conditions.

The chapter applies to Fermilab site and leased spaces and has two new forms associated with it.

The chapter has undergone labwide review and, remarkably, made it through the ten working day comment period without a single comment. The chapter is now ready for Directorate approval & release.

The chapter has been sent to you and Lisa Vega electronically. If a paper copy is required, you may either print one out or contact Lisa and she will provide one to you.

Please return this signature page to T.J. Sarlina at MS 119 after Directorate approval.
