36A Neuqua

The requirements for a Satellite Accumulation Unit are

- Area and containers must be kept in good condition
- Hazardous wastes emptied into a container must be compatible with one another
- Containers must be closed at all times except when adding or removing waste
- Containers must be marked with “Hazardous Waste” as soon as the first drop of waste is added
- Containers must be marked with the date of accumulation start date
- Maximum waste volume in storage is 55 gals. (or 1 quart for acute wastes)
