

Memorandum

June 14, 2010

To: Bruce Chrisman
From: Nancy Grossman 
Subject: Revised FESHM Chapters

FESHM Chapter 5101 Personal Protective Equipment (PPE) – has been revised. The Chapter was changed to include the following paragraph:

Retirees no longer qualify for this service with exception given to in-warranty repairs to frames only as follows: Retirees who need to exercise in-warranty repairs for their most recently purchased frames (Subcontractor verification mandatory), may do so by visiting the site where they made their purchase (on-site technician or designated off-site facility). Any repairs beyond initial warranty will be via their personal eye care professional and at Retiree's expense.

FESHM Chapter 6015 – Highly Protected Risk Inspection Program – has been revised.

This chapter is being modified to reflect the new frESHTRK system which has recently been utilized during HPR inspections with AD, PD and ES. The new streamlined process places more of the “finding” book keeping responsibilities such as assigning, tracking, determining causes, etc. on the audited D/S.

These chapters went out for Labwide review and all issues were addressed. After final approval, please return this approval page to Jody Federwitz at MS119 for posting on the web.
